

## Article 7 – Cookie Policy

Cookies are small pieces of information in the form of text files, created by a program on the server of the Website and Epione Platform, which are then placed on the hard drive of your computer when you use the Website or Platform (or on any other device through which you use the Website or Platform).

The Website and Platform uses cookies to identify you as a user of the Epione Platform, to remember your preferred language, and to facilitate navigation on the Website and Epione Platform for you. By using cookies you do not need to identify yourself repeatedly, e.g. for personalized services (such as filling in your user name or password, selecting a language).

### A. Types of cookies Epione uses

The following types of cookies are placed:

Analytical cookies compile statistics on certain information (e.g. popularity, number of visitors, ...).

Tracking cookies monitor browsing behaviour and follow users in order to later respond to their browsing behaviour (e.g. personalised promotional campaigns).

### B. Cookie management

You can manage the use of cookies yourself. For example, you may choose to block all cookies or only accept cookies. Please note, however, that certain features of the Website and Epione Platform are only available, accessible or workable if you have accepted cookies. Accepting cookies makes browsing the internet much easier and ensures that the websites you visit perform better. The use of cookies is generally accepted by internet users.

Managing and deleting cookies is also possible via the settings of your browser.
